

Instagram Pro Widget User Guide

Welcome to the User Guide for Instagram Pro. Thank you for choosing our product. This quick user guide describes the functionality of the Instagram Pro extension by NEKLO and explains how to use it. Enjoy.

Introduction

Instagram Pro is an advanced and extremely popular extension for Magento that enables a smooth and authorization-free integration with Instagram. The extension displays an Instagram feed in an online store and is the easiest way to show Instagram posts on your site.

The widget works in two modes: a grid and a slider. Both will look perfect in your Magento store. Flexible settings provide a number of options to choose from to make your store look even better with the Instagram Pro widget.

The extension gives you an opportunity to show any Instagram photos in your store, no matter whether they are yours or come from an account of a third party. Display photos by a hashtag, user ID, product hashtag or a category hashtag. With the Instagram Pro integration with Instagram is now fast and easy.

Installation

1. Install library using console command: `composer require raiym/instagram-php-scraper`

2. Unpack the zip file provided into the root folder of your Magento 2 installation.

3. From a command line run

```
bin/magento module:enable Neklo_Core
```

```
bin/magento module:enable Neklo_Instagrampro
```

```
bin/magento setup:upgrade
```

```
bin/magento setup:static-content:deploy
```

Magento Compatibility:

Community Edition 2.1.x - 2.2.x

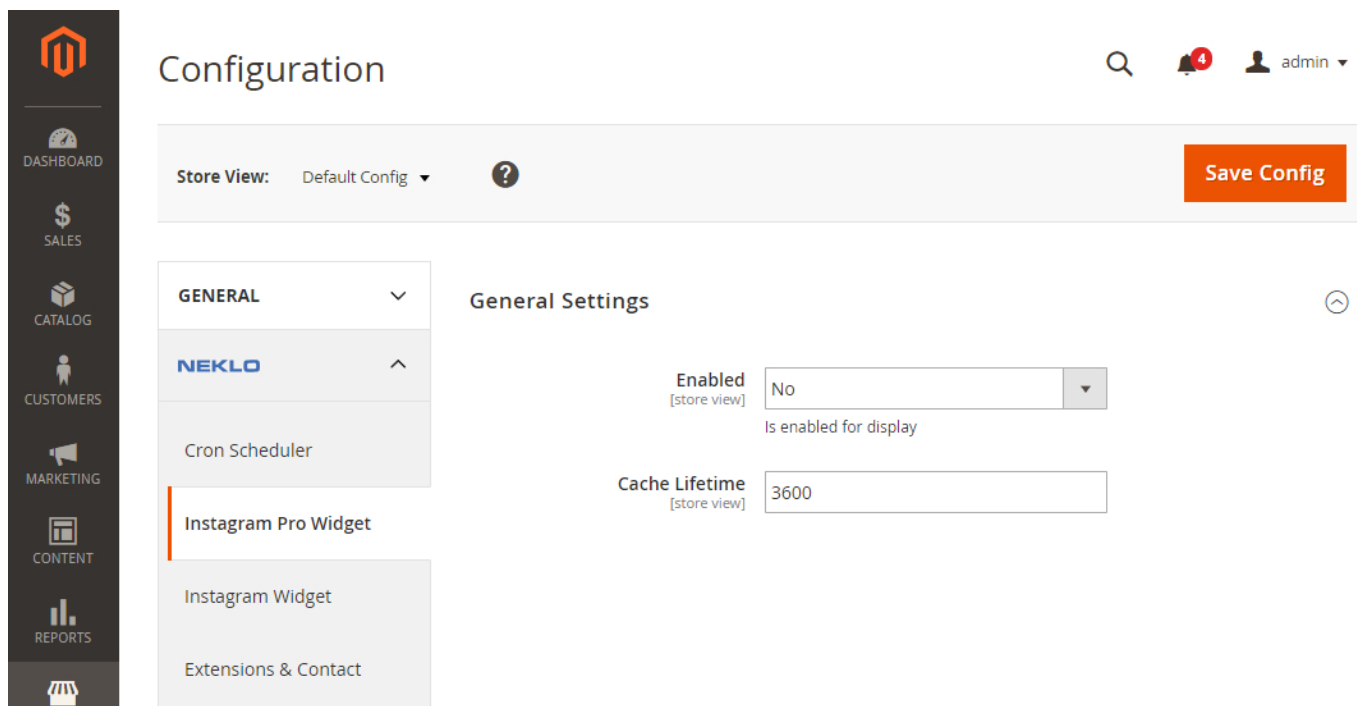

Enterprise Edition 2.1.x - 2.2.x

If you experience any issues with the installation, please contact us.

How to use. Getting started

To get started with the Instagram Pro, please log in to your Magento admin panel and follow these steps:

1. Go to Stores > Settings > Configuration and choose NEKLO > Instagram Pro Widget > General Settings.

The screenshot shows the Magento 2 Configuration interface. On the left is a sidebar with navigation links: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and a storefront icon. The main area is titled 'Configuration' and shows 'Store View: Default Config' with a 'Save Config' button. A left-hand menu lists 'GENERAL', 'NEKLO', 'Cron Scheduler', 'Instagram Pro Widget' (highlighted with an orange bar), 'Instagram Widget', and 'Extensions & Contact'. The 'General Settings' section for the Instagram Pro Widget is displayed, containing two settings: 'Enabled [store view]' set to 'No' with a note 'Is enabled for display', and 'Cache Lifetime [store view]' set to '3600'.

2. In the General Settings enable the Widget for a display in your store.
3. In Cache Lifetime enter for how long you would like your Instagram posts to be saved in cache. Note that once the images are cached, they load faster the next time.

Setting Up the Instagram Pro Widget in Your Magento Store

1. To set up the Instagram Pro Widget, in your admin panel, go to Content > Elements > Widgets and click to «Add Widget» button.

The screenshot shows the Magento Admin Panel's 'Widgets' section. The left sidebar has 'CONTENT' selected. The main area shows a table of 23 records. A red circle highlights two specific widgets:

Widget ID	Widget	Sort Order
1	Contact us info	
2	Footer Links	
3	Sale Left Menu	
4	Gear Left Menu	
5	Men's Left Menu	0
6	Women's Left Menu	0
24	Instagram Pro Grid Widget 1	10
25	Instagram Pro Slider Widget 2	120

2. Please select type = [Neklo] Instagram PRO Widget and the Design Theme you use

The screenshot shows the 'Widgets' settings page in the Magento Admin Panel. The left sidebar has 'CONTENT' selected. The main area shows the 'Settings' tab for a widget. The 'Type' is set to '[NEKLO] Instagram PRO Widget' and the 'Design Theme' is set to 'Magento Luma'. A 'Continue' button is visible at the bottom.

3. At Store Front Properties tab setup Widget Title, assign Store Views and select display on configuration you need at Layout Update block
